Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 15 May 2006.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 29 and 31-36 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.

DETAILED ACTION

Response to Arguments

1. Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 101

2. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 29 & 31-36 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

Considering claim 29, the instant claim is rejected as not being directed to statutory subject matter. In particular, the claimed language merely recites mathematical computations, and thus are considered abstract ideas and is not patentable. Diehr, 450 U.S. at 185, 209 USPQ at 7; accord, e.g., Chakrabarty, 447 U.S. at 309, 206 USPQ at 197; Parker v. Flook, 437 U.S. 584, 589, 198 USPQ 193, 197 (1978); Benson 409 U.S. at 67-68, 175 USPQ at 675; Funk, 333 U.S. at 130, 76 USPQ at 281. Nor can one patent “a novel and useful mathematical formula, “Flook, 437 U.S. at 585, 198 USPQ at 195.

For claims including such excluded subject matter to be eligible, the claim must be for a practical application of the abstract idea, law of nature or natural phenomenon. Diehr, 450 U.S. at 187, 209 USPQ at 8 (“application of law of nature or mathematical formula to a known structure or process may well be deserving of a patent protection”); Benson, 409, US at 71, 175 USPQ at 676 (rejecting formula claim because it has no substantial practical application”). Thus if the invention “transforms” a particle or physical object to a different state or thing; or produces a useful, concrete or tangible result. However, the examiner does not find that claims 29 & 31 transforms and article or produces a tangible result.

Instead the instant claims recite a method for “determining at least first second, and third correlation values”, “computing a Euclidean distance”, “determining at least fourth, fifth & sixth correlation values” “computing a Euclidean distance”, updating the Euclidean distance”, and “associating the third packet with the known source”. These method steps are directed to mathematical computations and do not recite in the affirmative that a tangible result is achieved. Nor, does the instant claims recite any language that affirms any particle or object is transformed from one state to a different state.

Claims 32-36, which depend from claims 29 & 31, are likewise treated.

Claim 29 is also rejected as being directed to a formula in the abstract. Diehr, 450 U.S. at 191, 209 USPQ at 10, “Phenomenon of nature, though just discovered, mental processes, nor

Art Unit: 2623

abstract intellectual concepts are not patentable, as they are basic tools of scientific and technological work”, Benson, 409 U.S. at 71-72, 175 USPQ at 676; cf. Diehr, 450 U.S. at 187, 209 USPQ at 8 (stressing that the patent applications in that case “did not seek to pre-empt the use of [an] equation, but instead sought only to “foreclose from others the use of that equation in conjunction with all other steps in their claimed process). Even though claim 29 falls within statutory type (i.e. a method), the instant claim is directed to known formula, (i.e., the Euclidean distance).

Allowable Subject Matter

3. Claims 29 & 31-36 are allowed over prior art of record.

Conclusion

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

DETAILED ACTION

Response to Arguments

1. Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 101

2. 35 U.S.C. 101 reads as follows:
